WORK EXPERIENCE

Software Developer
Siemens Technology and Services Private Limited

07/2019 – Present   *Bangalore*

Project- cRSP-NG

- Working on the cRSP-NG project. It is a web application developed for Siemens clients. It is an evolution on the classic application, which is used by technicians to remotely connect to the devices to know the fault, or to configure or upgrade the device rather than visiting the site where the device is placed.

Software Developer
Emids Technologies Pvt Ltd

02/2016 – 07/2019   *Bangalore*

emids is a global provider of healthcare technology expertise and consulting services and solutions that serve both payer and provider organizations. Headquartered in Nashville.

Projects

- Verscend - Busf (Business Unit Standard format): This Application is Analytics application which that leverages unparalleled clinical and financial data-sets to deliver deep insight into the performance of the healthcare system. This application includes various Business Units such as Payment Accuracy, Risk Adjustment, and Quality Intelligence. This Application helps end user to create various Client and Product based on the selected business unit. ⬈
- IQVIA - TechOps: The Project (TechOps) mainly deals with PMT application. This is nothing but "Patient Management Tool". This application mainly used by "American Heart Association" (AHA) related Organizations. This is used to capture the heart patient details to their PMT repository and further Measure calculation purpose. Measures are nothing but different types of studies related to Heart like Stroke Study, Heart Failure Study, etc. ⬈
- Revenue Cycle Solutions (RCS): RCS means Revenue Cycle Solutions. Main functionality of this is submitting the Claims from provider to payer and getting response from payer to provider in the form of EDI files. ⬈

EDUCATION

### Bachelor of Engineering
Visvesvaraya Technological University

09/2011 – 07/2015   *Bangalore*

Courses

- Electronics and Communication Engineering

SKILLS

Software Devlopment · Core Java · Data Structures · Spring core · Spring Boot · Spring cloud · Spring Data · REST services · Microservices · Maven · Gradle · Typescript · Database · SQL · AWS EC2 · AWS ECS · AWS RDS · Postgre SQL · Docker · Gitlab · SVN · Bitbucket · Angular

PERSONAL PROJECTS

Head Movement Based Voice Enabled Wireless Device Switching For Physically Challenged.
(07/2013 – 02/2014)

- Aim of the project is to design and construct head movement controlled device switching system for physically challenged. The user can wear the device to head and with simple head movement's he can request the basic needs like water, food or medicine using MEMS technology.

Wireless Bomb Detection and Disposal Robot
(09/2014 – 04/2015)

- Aim of this project is to provide safety to the bomb disposal squad by providing an extra line of defense. In our project we propose to design a robust wireless bomb disposal robot that would be capable of reaching close to the objects of threat, detect it and real scenario can be observed though the video camera which can send back video feedback to the observatory.

ACHIEVEMENTS

Star Award
Had been awarded as Star Developer for getting the zero defects continuously and solving the maximum number of stories for Q1'17

Cause for Applaud Award
Awarded for developing the maximum number of user story in a short period of time and getting the minimum defects for Q1'18

LANGUAGES

English
Full Professional Proficiency

Hindi
Native or Bilingual Proficiency
